

CLOTBA -- The Latest Cryptocurrency Lottery Platform that values Equal Opportunity AND earns you BNB!

Clotba is the Equalizer Tokenized Lottery Platform that is audited, reliable and fair. Clotba is addressing the problem of a fair game; that is what most tokenized entities (centralized or decentralized) are lacking. With “privileged” crowds and influencers alike leading the game to their own benefit, finally, a project is launched that is free of the rat race, gold-rush, and influencer disinformation.

“Best of All: Set it and Forget it for Infinite Chances to WIN!”

Clotba was designed with the sole idea and dedication to empowering all who believe they deserve a chance! We are here to provide equal chances for all to have access to life-changing wealth! All you ever need to do is to invest your spare change in Clotba tokens and be in the weekly draw every week automatically, a lottery can’t get any better or more fair!

Entering the Clotba Tokenized Lottery Platform offers three major opportunities for its investors:

- Weekly chance of winning the lottery (if you don’t, you are re-entered automatically as long as you hold your tokens).
- Earn BNB with your Clotba.
- Set it and forget it! No staking/unstaking fees or downloading just another wallet nor moving your coins through a bridge to have the same benefits promised to you in the very beginning.

What is it?

Clotba is a BEP 20 token and a revolutionary tokenized lottery platform that stands for CLOVER+LOTTERY+BABY BNB.

You’ll be mesmerized as you read on and uncover how to stash more BNB for free by simply purchasing Clotba tokens and how you can get equal opportunity and chances to win the pool prize every week!

Owning and Holding 10 Clotba means; Infinite Entries To Win The Pool Prize Drawn Every Single Sunday!

Tokenomics

Through dedicated smart contracts every lottery run on Clotba Pooled Lottery Platform contributes to the Clotba Token fund. With every Clotba Token acting as a permanent and endless lottery ticket, and min 10 Clotba tokens giving entry into all Clotba Lotteries held every Sunday, the Clotba Token offers token holders the chance to win the pooled prize fairly and equally.

Clotba will have a total supply of 50M (50,000,000) tokens with a circulating supply of 47M Clotba before we start sending 1% of each token purchase to the incinerator.

Clotba token purchases incur a 6% transaction fee of which 2% is fed into the lottery prize pool to fund and grow the lottery platform.

But wait, it gets better as the 1% is sent as wood into the oven and 3% drops back in your wallet as BNB rewards just like Santa dropping Christmas gifts down the chimney.

What's in it for you?

Clotba is a tokenized platform that gifts each and every one of its holders with access to the lottery pool accumulated in the lottery wallet. Clotba holders gain equal chances to win the weekly pool prize which grows with more transactions.

To stand a chance to win and participate in the weekly Clotba lottery held every Sunday at 18:00 EST, all you need to do is to purchase Clotba tokens. The pool prize grows with a percentage from each transaction. This means that all you have to do is to;

- Acquire your tokens (min 10 Clotba for lottery entry)
- Keep an eye on the weekly draw and winner address (if you care, winner's prize will be automatically issued to their wallet address anyways)
- Wait for your turn to land on life-changing wealth!

One lucky holder will win the total amount in the prize pool every Sunday!

How does the Clotba platform ensure a fair selection of winners and prove that the winning numbers are random and verifiable?

CLOTBA Contract accumulates the fee first and it waits for someone to make a transaction, there is one transaction per week that can run the lottery, cooldown resets on Sunday at the time specified. When the lottery is run it takes a list of holders eligible for the lottery (more than 10 tokens - the more tokens means the more chance to win) and looks for their balances, and is choosing a winning Wei, the person who holds it is the winner. Contract sends awarded BNB automatically.

Clotba has integrated a unique contract to bring provable randomness to the Clotba Tokenized Lottery Platform. Integrating industry-leading technology provides us all with access to a tamper-proof and auditable random number generator (RNG) that selects the winning wei every Sunday.

This creates a transparent and trustless user experience for users knowing that they can easily verify that the results are fair thanks to the smart contract tech.

How to Get Your CLOTBA Tokens?

Tokens will be offered at a fair launch process on Pinksale. Join our community channels and stay tuned so that you don't miss the announcement! FAQ and more info available on the Clotba project website at clotba.com

CLOTBA Roadmap
